NOTE

Two name changes for Neotropical Streblidae (Diptera)

In 1976 (Wenzel, R., Brigham Young Univ. Sci. Bull., Biol. Ser. 20(4): 1-177), I proposed the name *Phalcophila* for a new genus of batflies collected during a survey of Venezuelan mammals and ectoparasites (Smithsonian Venezuela Project). I thereby created a homonym, for, by a most unusual coincidence, Brennan and Reed (1973, J. Parasitol. 59: 706-710) had proposed the same generic name for a new chigger mite collected on that survey. A new name is proposed for the streblid taxon as follows:

Phalconomus Wenzel, NEW NAME

Phalcophila Wenzel, 1976: 15 (Type-species: *Phalcophila puliciformis* Wenzel, *loc. cit.*, p. 16) not *Phalcophila* Brennan and Reed, 1973: 708 (type-species: *Phalcophila antica* Brennan and Reed, *loc. cit.*).

In my 1976 paper (p. 127), I also described a new species of *Speiseria*, which I named *S. peytoni*, for Patricia Peyton Johnson. I here emend the trivial name to *peytonae* to give the correct ending for this patronymic, which I had inadvertently formed in the masculine gender.

Rupert L. Wenzel, *Field Museum of Natural History, Chicago, Illinois 60605.*
